

St. Agnes of Rome

Called Agnes of Rome in some lists, she was a virgin and martyr, held in esteem by the Church since her death. There is no documented evidence about the martyrdom of Agnes, although her feast day was assigned early and her grave near the Via Nomentana was recognized soon after her death. She was young when martyred; St. Ambrose stated that she was only twelve, and he testified about her death. Watch the video about her life below.
